CARS

Purpose

ISU (version 2.13.2.2)

Background

A new ISU (online update) will be released during this week.

This mail contains pre-information which applies for distribution to all sales and technical support and training staff. Kindly take this opportunity to inform your customers about this new update to their diagnostics software program.

ISU is completely automatic and once the computer is connected to the Internet, it will be updated upon the availability of a new updates.

ISU version 2.13.2.2

The upcoming release consists of *Database* and *Firmware*. The database update includes:

CARS

- Update of Volvo engine and Airbag systems for year model range 1999-2004.

The update of firmware regards functions that are required to support the database update.
